Rolling Guaranteed

The world's one-stop shop for conveyor rollers Product & Solution Provider

About Damon Industry

Established in 1997, Damon Industry has been delivering top-tier conveyor roller products and solutions to diverse industries, driven by rigorous quality standards, robust manufacturing capabilities, and consistent leadership in product specifications.

Across various automated logistics end-user industries like large-scale commercial sorting centers, new energy intelligent manufacturing facilities, and airport smart logistics, DAMON assists global clients in enhancing operational efficiency, cutting down logistics expenses, and striving to ensure universal user benefit from our offerings. DAMON has garnered enduring trust from

customers through a repertoire of over 40 product variations and application-focused customized services, showcasing innovation and practicality at their core.

DAMON has been recognized as the "Most Innovative Brand in China's Logistics Equipment Industry" and our products have been included in the "China's Green Warehousing and Distribution Technology and Equipment" catalog. Our unwavering commitment remains: delivering exceptional conveyor roller solutions to our global clientele.

In the future, the company will embrace the mission of "Creating Competitiveness for Customers' Logistics Systems" and strive towards the vision of "Establishing DAMON as the most influential provider of conveyor equipment components and services, globally."

Tabacco

Rubber Tyre

Major system integrators in pharmaceuticals, new energy, e-commerce/express delivery, manufacturing, food, airports, tobacco, and rubber tire industries all choose Damon Industry. Every year, tens of millions of Damon Industry rollers operate on conveyor lines spanning thousands of kilometers across various industries globally.

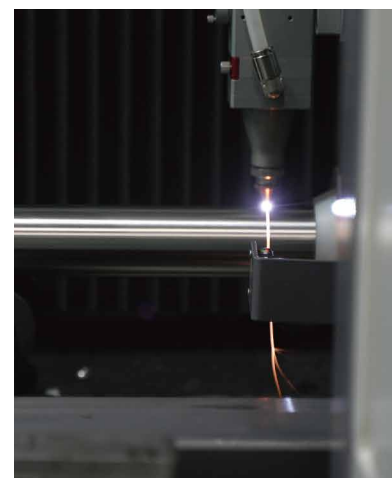

Smart manufacturing, production capacity advantages, and a stable, reliable supply chain are the pillars ensuring the delivery of top-notch products

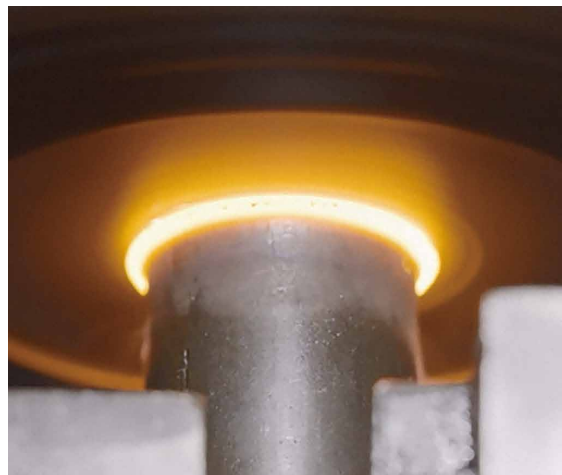

Across the globe, Damon Industry operates four manufacturing bases, facilitating large-scale production and offering comprehensive, one-stop solutions.

This setup enables us to have a competitive edge in product delivery timelines.

Advanced CNC equipment and automated processes enable the one-time shaping of steel pipes and shaft surfaces, eliminating manual operation discrepancies and ensuring the stability and qualification rate of batch-produced items.

Stringent attention to detail and a well-established quality control system ensure customer satisfaction and peace of mind

Damon Industry's independent quality control organization, rigorous testing process, and impeccable quality management system guarantee the quality of every roller.

Our independent, comprehensive research and development team alongside our testing center enables us to deliver products with even greater stability and reliability, ensuring quality for our customers

We have an industry-leading R&D team and a comprehensive testing center. Addressing industry pain points aligned with customer needs, we delve into field conditions, innovating and optimizing relentlessly from materials to processes, from structure to application. This pursuit enables us to offer customers the most stable, reliable products, and optimal solutions

- "Motor-Driven Drum Roller"
- "Conical Roller"

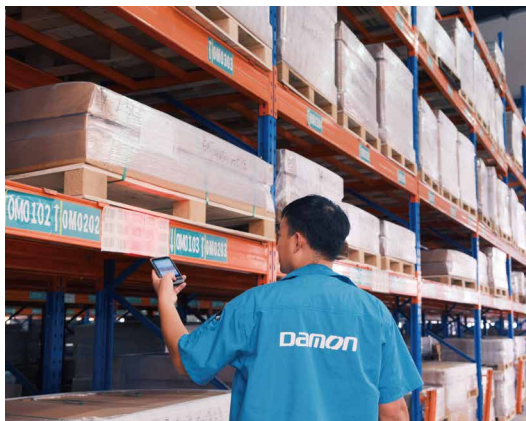

Information management runs through the entire process from production to sales and service, allowing customers to be worry-free, efficient, and time-saving.

- Automatic data acquisition minimizes human errors.
- Seamless integration across the supply chain maximizes production capacity.
- Customers receive precise and timely information.
- Clear data, and controlled processes optimize management significantly.

Damon's information management system runs through orders, design, production, and service, facilitating more convenient, efficient, and transparent communication with customers.

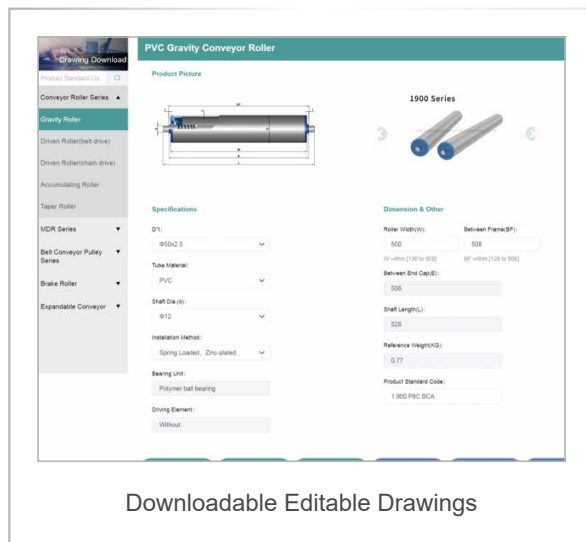

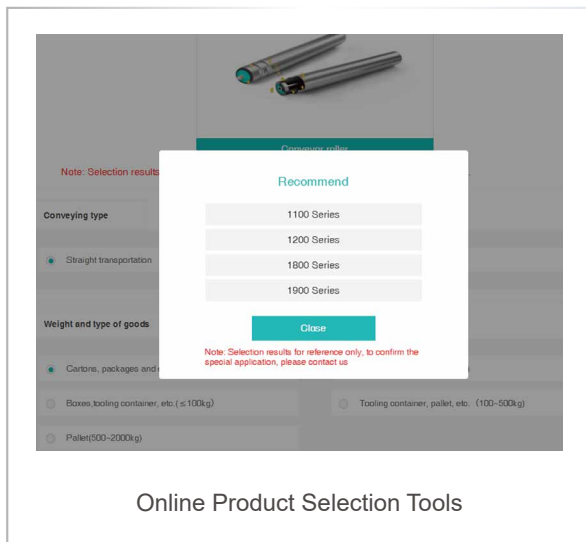

This ensures controlled and traceable manufacturing and quality.

Warehouse Information Management

Taking responsibility to contribute towards low-carbon, environmental protection, and sustainable development.

Damon Industry prioritizes customers, employees, communities, and other stakeholders.

Embracing responsibilities for environmental conservation, reduced energy consumption, safety, health, and charitable care, the company dedicates itself to these principles.

Through the implementation of lean production and technological innovation, Damon Industrial translates the concept of sustainable development into tangible outcomes.

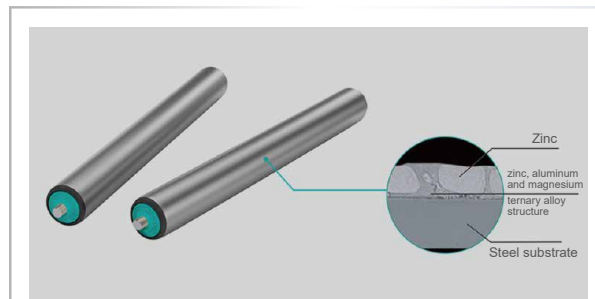

HSE Compliance, Concern for Employee Health

Concern for the Disadvantaged Groups in the Society

- By employing galvanized aluminum-magnesium pipes, we reduce annual wastewater emissions by 1000 tons.
- With the use of intelligent hibernation and new energy-efficient motors, we achieve energy savings and consumption reduction.
- Additionally, with dedicated bearings, we achieve up to a 20% reduction in energy consumption at maximum levels.
